SQUARE TO ROUND ADAPTORS

MODELS: SR

SUSTAINABLE EXTRUDED ALUMINUM

Dimensions are in inches (mm)

model SR

MODEL:

SR

Square to round adaptor.

DESCRIPTION:

1. Model SR is a 26-gauge galvanized steel square-to-round adaptor that is field-installed to allow the use of flexible or metal duct.
2. It can be mounted on any product and in all cases the round dimension must be 2" smaller than the square dimension with the exception of the AVP product line which allows for the round dimension to be identical to the square dimension, i.e., 12" square neck with 12" round connection.
3. In all instances a 10" round connection would be the largest available for a 12" x 12" neck dimension. A 3" collar is provided.
