

MODEL:

OL6-DB-CH

OL6-DB-CH

Outside air louvers with drainable blades and channel frame

DESCRIPTION:

1. High performance drainable blade 6" louver fabricated with mechanically joined 6063 extruded aluminum alloy.
2. Frames are .125" with blades being .125".
3. Blades are spaced 4" on centers at an angle of 38 degrees.
4. The blade design allows for excellent drainage of water through the horizontal gutter to the vertical drainage channel in the jambs and mullions.
5. Standard finish is mill aluminum with a variety of anodized and high performance painted finishes available.
6. Maximum one-piece construction is 12' wide x 8' high. Joining mullions are furnished for larger sizes.
