Return filter grille with 38° fixed blades. (for duct size).

### □ RF2DSME-OB

Return filter grille with 38° fixed blades and opposed blades damper. (for duct size).

## □ RF2FSME

Return filter grille with 38° fixed blades. (for filter size).

### □ RF2FSME-OB

Return filter grille with 38° fixed blades and opposed blades damper. (for filter size).

# DESCRIPTION:

- The Model RF2ME is assembled in a two-part system: one is the
  mounting frame that serves as a retainer for the filter, the other is the
  core that provides easy access to the filter. The core swings in and
  out of the mounting frame by means of two concealed pivot pins,
  and is held in place by two injection-molded nylon locking devices
  permanently attached to the mounting frame and located at the two
  corners opposite the pin side.
- 2. The core frame is separated from the blades by an extruded rigid PVC track that becomes an integral part of this frame. This method of assembly eliminates corrosion and vibration. The installation holes of the mounting frame are dimpled, allowing for a countersunk fastener head appearance.
- An optional opposed blade damper is attached to the return grille
  with positive-locking spring clips. It has the same aluminum
  construction and is screwdriver-operated through the face of the
  unit.
- 4. Available in clear anodized, white or a variety of custom colors.

### **OPTIONS:**

- 1. Finish
  - ☐ ANOD Clear Anodized
  - □ WHITE
  - ☐ MB Medium Bronze
  - □ B Black
    - Custom
